Bit-Clock

bitonlive

Bit Clock is the BitOnLive clock, customizable with his own logo.
Through this tool, you can view the various studio states, such as the "On Air" indication, the timer on the opening of the studio microphone and the telephone connection.
It is an application manageable through GET commands directly from the browser, and allows you to view service information or emergency messages always through the use of any browser.

The management of settings and messages is password-protected at different user levels.
