

MUSICAL

The user will have a unique tool for the organization and cataloging video files, songs, clips, commercial, programs and shows.

Philo also allows contextual management of audio files with videos or matched images.

With the same logic you will be able to plan generic events or linked to individual files, such as graphic display, banner or logos, or command to external devices.

Philo can manage multiple channels, giving the possibility, if desired, to share resources in common spaces.

Creating playlist is easy and intuitive and can be managed at different levels, from manual, very simple with the drag and drop of single elements or entire programming blocks, to fully automatic.

Parametric programming gives the user the ability to control the timing and mode of repetition of songs and artists.

Philo includes a basic advertising planning tool.

The software is multilingual, name and required fields are customizable.

SYSTEM REQUIREMENTS

PLAYOUT Minimum

CPU Pentium i5, 8 GB RAM

Suggested

CPU Pentium i7, 8 GB RAM, AMD or NVIDIA Graphics Card

Supported Operating Systems

Windows 7, Windows 8, Windows 10

Supported Formats

Support for most popular video formats, including AVI, DV, HDV, IMX, XDCAM SD / HD, MPEG2 (fino a 1080i 4:2:2), AVID DNxHD, MXF MPEG 2 Long GOP, MXF AS-03, AVC -Intra, Quicktime and Windows media.

Supported Languages

English, French, Spanish, Italian, Arabic

Features

- Archive songs, clips, advertising, programs, shows, automations
- TV series management (shows, sports championships, series etc.) with episodes and replicas planning, set opener, jingles and matched graphics
- Scheduling parametric flash animations, banner, playout automatic start and stop
- Basic advertising scheduler
- Configuration for advertising jingle (opening, closure, intermezzo)
- Editing file (MarkIn, MarkOut, Intro, Outro, RefrainIn, RefrainOut)
- Multiple markings for programs
- Setting entire programming blocks
- Parametric scheduling
- Managing the schedule structure based on week's days

- Management of infinite templates for creating the schedule
- o Daily playlist creation manual or automatic
- Management of manual playlist
- o Customize colors of tables, categories, groups, filters
- Customization of required fields
- Customize Views
- o Drag and drop
- Event Management
- Set graphic styles
- Graphic layout management
- Time stopset management
- Live source management
- Multi-channel
- Multi-user
