General	2
Zelos Database	3
Database.....	4
The Settings	5
Layout.....	6
Checks	6
Work Area	7
Tools (area A)	8
Break hours table (area B)	8
The library members area (C)	9
Function keys (Area (D)	10
Use Manual Control.....	10

Configuration

Click on  Setup to open the configuration window for the **Manual Control**.

General

The screenshot shows a configuration window titled 'General' with several tabs: 'General', 'Database Zelos', 'Database', 'Settings', 'Layout', and 'Checks'. The 'General' tab is active. It contains the following fields:

- Shared Folder:** A text field containing 'K:\Shared\' with a browse button (green folder icon) to its right.
- Data Folder:** A text field with a browse button (green folder icon) to its right.
- Playlist save:** A section header for a group of fields.
- Run application:** A text field with a browse button (green folder icon) to its right.
- Arguments:** A text field.

At the bottom right of the window are two buttons: 'Save' (with a floppy disk icon) and 'Cancel' (with a red 'X' icon).

- **Shared Folder:** enter the path of the shared folder
- **Date Folder:** location of the programming files

Playlist Save

- **Run application:** path and name of the application you want to run after save changes.
- **Arguments:** additional commands at the start of the application indicated.

Zelos Database

The screenshot shows a configuration window for the Zelos Database. It features a tabbed interface with the following tabs: General, Database Zelos (selected), Database, Settings, Layout, and Checks. The Database Zelos tab contains the following fields:

- Server: A text input field.
- Schema: A text input field.
- User: A text input field.
- Password: A text input field.
- Prefix: A text input field containing the value 'z'.
- Timeout: A spin box set to 3.
- Port: A spin box set to 3306.

At the bottom of the window, there are two buttons: 'Save' (with a floppy disk icon) and 'Cancel' (with a red 'X' icon).

- **Server:** name or address of Zelos server
- **Schema:** database schema name
- **User:** user name of the database
- **Password:** password for access to the database
- **Prefix:** prefix of database
- **Timeout:** waiting time for the connection to the database
- **Port:** communication port for with the server

Database

The screenshot shows the 'Database' configuration window. It features a tabbed interface with 'Database' selected. The fields are as follows:

- Application:** A dropdown menu showing 'Philo'.
- Server:** An empty text input field.
- Schema:** An empty text input field.
- User:** An empty text input field.
- Password:** An empty text input field.
- Prefix:** A text input field containing 'm'.
- Timeout:** A spin box set to '3'.
- Port:** A spin box set to '3306'.
- Test connection:** A button to verify the database connection.
- Save/Cancel:** Buttons at the bottom right to save or cancel the changes.

- **Application:** select if present the media manager application (Philo, External Manager)
- **Server:** The name or address of the server to access the database
- **Schema:** database schema name
- **User:** The user name of the database
- **Password:** The password for access to the database
- **Prefix:** prefix databases
- **Timeout:** waiting time for the connection to the database
- **Port:** Port for communication with the server

The Settings

- **Modify Database:** enables the modification of the data in the **Zelos** database
- **Move item between areas:** Allows you to move the scheduled adv items through different areas.
- **Join local and common:** joins the local programming of the area with the common programming
- **Title mode:** Select the type of title to display for the various elements
- **Sort by:** indicate the type of sort to be respected
- **Show difference less than:** show the duration differences for the same break in different areas if more of the indicated time
- **Fill range:** indicate the time

Layout

The screenshot shows the 'Layout' tab of a settings window. The 'Size %' field is set to 100 and the 'Height' field is set to 140. Both fields have up and down arrow buttons. At the bottom right, there are 'Save' and 'Cancel' buttons with a floppy disk icon and a red prohibition sign respectively.

- **Size:** indicate the percentage relative to the size of the character
- **Height:** Enter the height of the rows of break table

Checks

The screenshot shows the 'Checks' tab of the same settings window. It contains two fields: 'Break max length (seconds)' and 'Hour max length (seconds)', both set to 0. Both fields have up and down arrow buttons. At the bottom right, there are 'Save' and 'Cancel' buttons with a floppy disk icon and a red prohibition sign respectively.

- **Break max length:** indicate the maximum duration of advertising breaks in seconds
- **Huor max length:** indicate the maximum duration of the spots within the hour

Work Area

The screenshot displays the bitonlive Work Area interface. The main window is divided into three primary sections:

- A => Tools:** Located at the top left, containing menu items like Setup, Language, Show Log, and Exit, along with a date selector (Wednesday, October 04, 2017) and checkboxes for 'Show all hours' and 'Load filled day'.
- B => Break hours table:** A large table in the center showing a schedule of breaks and activities. It includes columns for time slots (e.g., 13:40, 13:58, 14:20, 14:40, 14:58) and lists various events and sponsors (e.g., RETE 1 - MILANO - MONZA, RETE 2 - VARESE-VERBANIA-VCO-SVIZZERA, RETE 3 - COMO-CHIASSO-CO/LC).
- C => Library elements (Zelos and Philo):** A panel on the right side showing a list of elements with columns for Cliente, Contratto, Alias, and Data. It includes a search bar and a 'Recycler' button.

At the bottom of the main window, there is a section labeled **D => function and control keys**, which includes buttons for 'Save', 'Check file', 'Recalculate duration', 'Reload all', and a 'Conflict' status indicator.

The main window is divided in three parts

- A => Tools
- B => Break hours table
- C => Library elements (Zelos and Philo)
- D => function and control keys

Tools (area A)

In the Tools area you can access the setup program, view the log of the application and choose the mode of display of times.

Access to the configuration of the program

Change the language of the program

View the application log

Exit the program

Through the Calendar can display several days of programming

- **Show all hours:** also displays the estate advertisements that do not have any programming
- **Load filled day:** displays the break inclusive of filler elements and files intraspot

Function keys (Area (D))

 Check file	Checks for the existence of programed files and generates a txt file with a list of the missing ones
 Recalculate duration	Recalculate the lifetime of the files included in the Break
 Reload all	Reload the schedulation made up to the last changes saved
 Save	Save changes made

- **Conflict:** legend of conflicts within the advertising block

 Customer	Conflict customer (customer already present in the break)
 Category	Conflict category (category already present in the break)
 Sub Category	The conflict under category (sub category already present in the break)

Use Manual Control

Through the function of Drag&Drop is possible:

- Move the items within the same time, by modifying the position inside the bar
- Move items in different times from those programed
- Move items between the different areas (if the function is enabled)

You can remove items from the advertising break by dragging them inside the trash. In this way, it is possible to keep under control all removed spots from the scheduling and, if necessary, it is possible to reinsert them in other times or even in other days of advertising schedulation.

To make the changes carried out it is necessary to press the button
